Find the right size for your customer following our step-by-step guide

When it comes to bras, base your measurements on a well-fitting bra, preferably one without underwires.

The measured size serves as a guideline.

The size offering optimum comfort to each individual customer can only be determined by fitting the item.

Underbust measurement (1)

Take the measurement by holding the tape directly under the bust. This measurement determines the bra size.

Bust measurement

Take the bust measurement (2) by holding the tape horizontally over the widest point of the breast.

Use the chart to find the fitting cup size

Pants size

Measure the waist (3) by holding the tape horizontally around the smallest part of the waist.

Measure hips (4) by holding the tape horizontally around the widest part of the hips.

If there is a considerable difference between the waist and hip measurement, always take the larger size.
