

CARE

Lymph relief with Lymph O Fit™

Lymph O Fit™

"Lymph O Fit™" is a **special material for lymphatic relief**. It is characterised by the **3D dot texture** on the inside. This texture has a massaging and draining effect on the dermis and its smaller lymphatic vessels. This activates and improves **lymphatic drainage** and supports scar healing.

Good moisture wicking and breathability ensure a comfortable feeling on the skin. The material is used for the treatment of lymphatic diseases, as it applies gentle compression to the lymph vessels and the skin. It is used to reduce lymphoedema in the breast, haematoma, fibrosis, after arm lift, liposuction, after lymph node transplantation and for mild lymphoedema in the legs and groin.

Lymph O Fit™ tights are a great supplement (alternating care) to conventional medical compression therapy and for sports activities. Tights for "every day" wear.

Note: All Lymph O Fit™ products can only be used after wounds have completely healed.
